The principal receipts of produce from domestic ports were 48,786 bags sugar, 870 bags rice, 1,312 goat skins and hides, 343 live stock, 195 bags awa and 40 bags coffee. Bendstreet's, March 24th, says that Sir. Bernhard Samuelson, president of the Asso-ciation of Chambers of Commerce, in his annnal address congratulated the members on the recent improvement in trade, especially in the development of the British mercantile marine. This improvement has made itself felt in stimulating the production and con-sumption of iron and steel. Regarding the increased production of iron and steel in the United States, he said that though this in-creased production does not affect the trade of the United Kingdom in neutral markets. yet it was worthy of attention that, whereas in 1877 the production of pig iron in the United States was only one-third that of the United Kingdom, it has increased from year to year, till last year it amounted to more than seven-eighths of the production of the United Kingdom. He said that whenever the time arrives that ships can be built in America of duty-free materials, or be imported for registration here, the time will also have gone when nearly all the enormous trade between the two countries will, as now, be carried in British bottoms.

COMMERCIAL.

The arrivals from foreign ports, during the

week, were the Wm. G. Irwin, the Discovery

and the Wm. B. Godfrey from San Francisco,

the Morning Star from Micronesia, the

Veritas from Newcastle and the Russian

man-of-war Razboynik from Marquesas and

The departure were the Robert Sudden (from Kahului), the S. N. Castle, the Lady Lampson, the Natura and the Wm. G. Irwin

for San Francisco, with cargoes of an aggregate value of \$373,467.77.

HONOLULU, APRIL 24, 1888.

The iron and steel exports from the United Kingdon to the United States in February of year amounted to 48,866 tons besides engines and machinery valued at £55,696, against 127,443 tons and £44,516 worth of engines and machinery during the corres-ponding month of 1887.

Mesers. Willett, Hamlen & Co. have the following on the sugar situation:—Centrifugal sugar of 96° test is the standard of raw sugar, and granulated is the standard of raw sugar, and granulated is the standard of refined sugar. In 1884 the average difference in prices of these two standards was \(\frac{1}{2} \) c. per pound, in 1885 it was \(\frac{1}{2} \) c. per pound, in 1886 it was \(\frac{1}{2} \) c. per pound, and in 1887 to October 1 the average difference was %c. per pound. In October, 1887, the average differ-ence was %c. per pound, in November it was %c. per pound, and in December %c. per pound. In January, 1888, the average difference was 1 3-16c, per pound, and in February 114c, per pound. The cost of refining, including loss of weight, is covered by %c. per pound between these standards. In 1888, all the non-trust refineries, say two in Philadelthe non-trust renneries, say two in Philadel-phia, one in Boston and two in San Fran-eisco, will be run to their fullest capacity, and should melt about 370,000 tons sugar (27 per cent. of entire production), which will leave at least 1,000,000 tons to be melted by the "Trust" refineries, or say 73 per cent. of the "Trust" refineries, or say 73 per cent. of entire production. One million tons, at 2,240 pounds per ton, is 2,240,000,000 pounds, which, at the present difference of 1½c, per pound between the two standards of raw and refined, gives ½c, per pound net profit, or say \$14,000,000 net profit to the "Trust" is said to be about \$45,000,000 to \$50,000,000, which represents say \$15,000,000 to \$20,000,000 original value of the separate refineries, and say \$30,000,000 to \$35,000,000 added as value of the "Trust" organization.

The Rothschild Company are shipping 500,-000 barrels of oil from Russia to England this year. A Loudon firm has chartered two tank steamers, bought a third, and are about ordering two more of 3,500 tons of oil capacity each, in connection with the arrange-ment. The oil will be equal to the finest water-white oils refined in America.

The importations of American illuminating

oil into Russia on the Baltic and White sens decreased from 7,403,860 gallons in 1873 to 275,047 gallons in 1886, and none whatever in

The exports of petrolium from Russia, in 1887, were 55,489,185 gallons which was 7,-129,050 gallons sent from sources of production to other points in Russia, gives a grand total of 62,618,235 gallons.

The ships built in Maine last year aggregated 17,455 tons, as against 16,366 tons in the previous year.

At Bath, one company has nine contracts in hand, including one steamer, two steam yachts, and three 1000-ton schooners. The last named are for the coal-carrying trade.

Shipping Notes.

The W H Dimond arrived, last week, at Kahului.

The Hawaiian bark W B Godfrey has a cargo valued at \$14,010. The W G Hall sails on her usual route at

10 o'clock, Tuesday morning. The Robert Sudden took 1,200 tons sugar from Kahului for San Francisco. The bgtne Wm. G. Irwin arrived Tues-

day, 18 days from San Francisco. Captain Goodman, formerly of the Ha-waiian brig Hazard, takes command of the schooner Golden Fleece, sailed April 2d for

The bark Veritas arrived Sunday morning, 49 days from Newcastle. She is coal laden, having about 1,000 tons for the O. S. S. Co. The Alice Muir, Alice May and Island City had left for this port a week before the Ve-

The sugar shipments per S. N. Castle for San Francisco were 640,250 lbs., value \$28,-811 25, Castle & Cooke: 656,967 lbs., value \$27,253 07. Schaefer & Co.; 459,816 lbs., value \$19,621 56, C. Brewer & Co. Total sugar, 878 tons, 10 cwt., 33 lbs., value \$75,685 88. There was also a shipment of 56 casks sperm oil, by A. W. Peirce & Co.

The bark Lady Lampson, Captain Sodergren, sailed Tuesday with a cargo of 688 tons, 15 cwt., 30 lbs. sugar, value \$59,486 18, and 200 bunches bananas, value \$200. The shipments of augar were: 220,305 lbs., value \$10,107 l8, T. H. Davies & Co.; 678,455 lbs., value \$28,834 35, C. Brewer & Co.; 478,770 lbs., value \$20,544 65, Castle & Cooke. The bananas were shipped by A. J. Campbell. Total value of cargo, \$59,686 18.

The brigantine Wm G Irwin, Captain Mc-Culloch, sailed Sunday for San Francisco, with mails, passengers and a cargo of engar, rice and coffee, value \$55,496 42. The shipments were: Sugar—532,220 lbs, value \$25,-751, W G Irwin & Co; 166,574 lbs, value \$8,549 42, C Afong: 88,597 lbs, \$4,260, Hyman Bros; 43,680 lbs, value \$2,040, M Phillips & Co; Rice—204,000 lbs, value \$8,500, M S Grinbaum & Co; 45,100 lbs, value \$2,250, Sing Chong & Co; 85,000 lbs, value \$4,100, Hyman Bros; Coffee—200 lbs, value \$46, Hyman Bros; Coffee —200 lbs,

The bark Natuna, Captain Grahn, sailed Saturday for San Francisco with a cargo of 821 tons 15 cwt 28 lbs sugar, value \$74,599 29; 1,200 tons merchandise in transit; 1 case dry L200 tons merchandise in transit: I case dry goods, value \$300, shipped by W C Sproull; 7 cases bisouit, value \$35, Schaefer & Co. The sugar shipments were: 266,354 lbs. value \$13,021 82, Grinbaum & Co; 511,538 lbs. \$23,407 15, Hackfeld & Co; 153,411 lbs. value \$6,833 59, Davies & Co; 88,200 lbs. value \$5,053 63, Schaefer & Co; 501,430 lbs. value \$5,053 63, Schaefer & Co; 501,430 lbs. value \$22,564 35, Castle & Cooke

\$22,564 35, Castle & Cooke. The steam barkentine Morning Star, Captain Garland, arrived Wednesday, 4 days from Ruk. The Morning Star left this port July 5, 1887, and proceeded to Ruk, the nearest of the Carolines, arriving there in 33 days; left Ruk, August 9th, and passed to Ponape, 4 days, steaming the entire dis-tance. At Ponape, first heard of the troubles of the Spanish; Captain Garland, by invita-tion, went aboard the Spanish store ship; Spanish Captain wanted to charter the Star-to take his people to Manila; declined; left Ponape for Strong's Island (Kusaie), August 18th and arrived August 21st; sailed thence August 27th for the Gilbert Islands; were 2½ months in this group, cruising among the islands, visiting missionary stations; returned to Kusaie, November 6th; thence to Ponape to see if any help was wanted by mission; found affairs quiet; re-turned to Kusaie; then proceeded to the Mar-shall Islands; were about six weeks in that group; made Kusaie again January 13, 1888; sailed for Ruk, January 19th, touching at Ponape; arrived at Ruk February 6th; then had to make another special visit to Ponape and touched at several of the Mortlock Islands on the way; arrived at Ponape February 29tb; left for Ruk, March 3; ar-rived on the 5th. Took on board Mrs. R. Logan, widow of the deceased missionary, and two children, also another passenger, Mr. Schultz; sailed for Honolulu March 6th; arrived, as first above stated, after a cruise of 9 months, 13 days, She will probably remain in port about two months.

BORN. LOSE.-At Honolulu, April 19, 1888, the wife of H. Lose of a son.

MARRIED.

MILLER-WATSON.—At Honokaa, Hama-kua, Hawaii, April 5, 1888, by the Rev. J. Mortimer Silver, Charles David Miller to Harriet Alice Watson, sister-in-law to Dr. H. B. Greenfield.

Over one hundred new iron steamers, many of them very large, are said to be now in hand upon the east coast of England, while others are down on the banks of the Clyde. The iron market is advancing prices by leaps, and shipbuilding is renewed with great activity. All the boats now on the stocks will be afloat and ready to engage in business in a few

[Continued from page 7.] FIFTH DAY.

The institute had a full attendance of teachers besides several visitors, at the closing session, on Friday. The visi-tors present were the Hon. C.R. Bishop, president of the Board of Education, with Professor W. D. Alexander and Mr. W.W. Hall, members of that body; Professor W. C. Merritt of Oahu College; Professor M. M. Scott, Principal of Fort Street School; Mr. T. H. Gibson of Kauai, Bandmaster Berger and Mrs. McCully.

Mr. Lucas took up the subject of phonics and conducted a thorough review of the lessons of the week on this

Mr. Atkinson discussed the subject of singing as an important and indispensable feature of school work, and showed its educational advantages. He stated that the Board of Education considered it necessary that singing should be taught by every teacher. It was strongly recommended, especially to the younger teachers in Honolulu schools, to make arrangements for attending Mr. Berger's lessons in the schools. The propriety of drilling pupils in the words of all the school ngs was emphasized as an important

collateral in teaching English. Mr. Berger followed with some re-marks on singing in Germany and dwelt upon the training of the ear as an indispensable part of the teaching of music. He observed that it was not because Germans were Germans that they were noted as singers but because all German children are taught singing from their earliest years in the schools as well as in their homes. Hawaiians, as a race, have a special aptness for music and this fact could be turned to

good account in their school training. Mrs. Hendry gave a full lesson on decimals, developing the subject in the line of language and showing how Arithmetic might be utilized in the direction of teaching exactness in expression.

Professor Scott also offered some practical remarks on the subject of Arithmetic, and was followed by Mr. Atkinson on the same subject.

Mr. Atkinson took up the subject of Geography and showed how geography, like other lessons, should proceed 'from the known to the unknown." He would have a complete reversal of the old-fashioned method of beginning this subject at the ends of the earth, and as the pupil advanced in the study he approached nearer to his own place on the surface of the planet, acquainting himself with the topography of his own country after he had learned all about the Himalayas, the Yang-tse-Kiang and Central Africa. He would have geography start at home, and when the pupils acquired clear ideas of their own local surroundings, they might enlarge the scope of their observations and take in the regions beyond. The first General Geography lessons for pupils in this country to learn is that of the Hawaiian Islands.

Professor Scott followed in a similar line of argument and illustrated the point by relating how he had when recently returning to town on the steamer inquired of a passenger, an old resident of Lahaina, the height of the mountains in that vicinity, but the question was "too hard" for the gentleman enquired of. As a test of the general tendency to ignore facts in local geography, the Professor brought the matter right home by inquiring of those present the height of Punchbowl and the Pali, when it was discovered that only a few of the members of the

class were in possession of the figures. Mr. Atkinson returned to the subject of geography and referred to a manuscript geography, of his own preparation, that he had used in Honolulu schools, both public and private, suggesting to other teachers that they might find it advantageous to furnish themselves in the same manner. He further recommended that historical incidents should be introduced to give point and interest to geographical study, for, from the earliest times, it was a well recognized principle in scholarship, that geo-graphy and history go hand in hand. Professor Alexander was called on

for some remarks and responded, substantially, as follows:

Though I was at one time a 'Hoosier schoolmaster," I have been so long out of the profession that I count myself a layman. I will say, however, that I have been highly gratified by the success of this convention, and by the eminently practical character of its proceedings. The leading idea seems to have been the supreme necessity of laying a solid foundation at the beginning, and the paramount importance of primary studies. These last really require very high qualifications on the part of the teacher, such as a thorough knowledge of the nature of a child's mind and of the true method of its development, as well as insight, sympathy tact, resource and ingenuity, infinite patience, in a word, something of that Divine Charity which "never faileth: these are rare gifts which money can-

I think, therefore, that the really successful primary teacher should be held in special regard. I have sometimes thought that perhaps it is in some respects an advantage to you that the educational organization of this Kingdom is simpler and more primitive than that of most other civilized countries, because there is more scope for individuality on the part of teachers and also of scholars. Here there is no reason for any teacher to complain of being oppressed or crushed by the educational machine, no excuse for his degenerating from an

educator into a marking machine. I need not tell you that the mixed character of our population greatly increases the difficulty and responsibility of your position. It is for you to train this motley mass in the knowledge and use of one common language, and also | Mortgagees. in the habits and principles that will fit them for their duties as citizens under a constitutional government.

If we are to have a people here and a country worthy of the name, we will to any other agencies in attaining the result. He added that the Board of Education contemplates the preparation of text books on the geography

and history of these Islands.

Hon. C. R. Bishop addressed the meeting briefly. Referring to Prof. Alexander's speech, he alluded to the Professor as having been an experienced teacher himself and as having said more than he could say, not being a teacher at all; but he felt an interest in the schools and in teaching. He

THE HONOLULU INSTITUTE, and the other members of the Board of Education had been much pleased with the interest that had been shown in the examinations and in the convention; and had no doubt that the re-

sult would be advantageous to all concerned. It might be that a number of those present were not intending to make teaching their profession, but what-ever was worth doing at all, should be well done, whether for a longer or a shorter time. No person could in early life say with certainty what he might like to do or be obliged to do later in life, or where his lot might be cast; and so, to know how to teach might be of great advantage, and certainly one could not be more honorably or useful-

ly employed. Those who had been educated in this country had not had the advantages of Normal School training, as teachers in the United States and some other countries have; but the instruction which they had lately received in the gatherings of teachers would be a great help to them.

Mr. Atkinson thanked the teachers for their punctual attendance, close attention and manifest interest in the work before them during the week. He also expressed his thanks especially to Mrs. Hendry and Mr. Lucas for their able assistance in elucidating the branches they had taken up. The Institute was then formally

Dr. Hillebrand's Hawaiian Flora-

Prof. Alexander has received a letter from his son, written at Washington, stating that Mr. Hillebrand, son of the late Dr. Hillebrand, was daily expecting advance copies of his father's great work, "The Flora of the Hawaiian Islands." The book is being issued from a publishing house in Germany. There will be much eager interest felt here for its appearance, by students of nature and all who had opportunities of knowing the eminent doctor's tal-ents and assiduity of researches. The book has been subsidized by the Hawaiian Legislature.

Accident on Board Ship.

ome sailors of the ship Mystic Belle, lying in the stream, were skylarking on board on Monday of last week, one of them fell backward from the upper to the lower deck. As he appeared to be seriously injured, a signal of distress was hoisted, which brought a boat from the United States flagship Vandalia. The boat's crew immediately returned to the latter vessel and took Dr. Wieber off to the Mystic Belle, where he attended to the suffering man. He found him pretty badly but not seriously in-jured, and left him on board as comfortable as medical skill could make
